- Member UK Acquired Brain Injury Forum
- Member World Federation for NeuroRehabilitation

PRESENT & PAST POSITIONS

Clinical Director and Consultant in Specialist

NeuroRehabilitation, Central England Rehabilitation Unit (CERU) Leamington Spa Hospital. I divide my working week between CERU and University Hospitals Coventry & Warwickshire undertaking major trauma work for hyper-acute and post-acute rehabilitation.

Medical Director at Hunters Moor NeuroRehabilitation Centre - part of Christchurch and Active Care Groups - Birmingham.

Prior to these roles, I previously held dual consultant role as the Medical Lead for both the Bath Head Injury Unit and Bath Pain Management Unit at the Royal National Hospital for Rheumatic Diseases (2004-2006). I have also been a Consultant for the British Horseracing Authority for post-concussion examination (2007-2018)

CLINICAL EXPERIENCE

I have over 30 years' experience as a medical doctor, of which the last 24 years has been focussed entirely on the rehabilitation of people with severe and complex disabilities, particularly brain injury (traumatic and vascular including stroke), post-concussion injury, spinal injury, and long-term neurological conditions such as multiple sclerosis and neuromuscular disorders.

My clinical practice involves assessment of disability, determination of therapy requirements, patient-centred goal planning and case conferences and overview of the rehabilitation process. This includes assessment of care needs, advice on employment, leisure, and social prospects for the disabled person. I have expertise in treating patients with complex spasticity, disabling muscle spasms and chronic pain syndromes.

MEDICO-LEGAL EXPERIENCE & TRAINING

I have been involved in medico-legal practice for the last 10 years. The majority of my work has focussed on adults (age range 16-65 years).

I have produced over 50 reports for the Court on acquired brain injury and for different solicitor firms. I have produced over 180 medical reports for insurance companies of which over 90% are on brain injury.

Dr Eliezar Okirie
