ABOUT DR HUTTON

Dr Lee Hutton is a Consultant Clinical Neuropsychologist with specialist experience in medico-legal neuropsychological assessment and expert witness reporting. His independent practice includes opinion on the cognitive, emotional and behavioural effects of neurological injury, rehabilitation needs, prognosis and decision-specific mental capacity. His medico-legal work draws on extensive experience assessing adults with acquired brain injury and other complex neurological conditions across inpatient, outpatient and community settings.

He has more than 25 years' experience in NHS psychological services, including 20 years as a qualified Clinical Psychologist, with specialist practice in adult neuropsychology, neurorehabilitation and neuropsychiatry.

Dr Hutton's areas of medico-legal expertise include acquired brain injury, neuropsychological assessment, cognitive rehabilitation, complex cognitive and behavioural presentations, mental capacity, rehabilitation needs and prognosis. His wider clinical background includes traumatic brain injury, neuro-oncology, neuropsychiatry and community neurorehabilitation, with further specialist experience in concussion and brain health assessment in professional and contact sport.
